

Climate Chamber Mission Programme

Tuesday 2 November

HOST: Clare English

7:15am – 8am

Networking and Expo

8:15am – 9:45am

Glasgow: The Host of COP26

What are the roles of sustainable and circular organisation and how can businesses collaborate internationally to deliver on COP26 ambitions?

Why Glasgow? This session will explore how Glasgow is capitalising as host city of COP and playing a leading role globally in sustainable and circular initiatives.

Paul Little, Principal/Chief Executive – City of Glasgow College and President of Glasgow Chamber of Commerce
Cllr Susan Aitken – Leader of Glasgow City Council
Keith Anderson – Chief Executive Officer – ScottishPower
Marc de Wit – Director of Strategic Alliances – Circle Economy
Katie Murray – Chief Financial Officer – NatWest Group
Dave Ingram – Chief Procurement Officer – Unilever

10am – 11am

The role of sustainability and circular economy in International Trade – what is the future?

Circular economy policies and initiatives largely take place domestically at the national or regional level. As business and industry continue to internationalise and grow at increasingly faster rates, it is important to both recognise and explore the relationship between the circular economy and international trade.

International trade plays an important role in circular supply chains in materials and products, end-of-life value chains in waste and scrap, secondary raw materials and second-hand goods. Trade can provide important opportunities to achieve economies of scale to use materials in a sustainable way and to drive resource efficiency and circular economy initiatives.

At the same time, it is essential to ensure that these trade flows do not result in environmental degradation.

(Trade, Resource efficiency and Circular Economy, OECD)

Oriana Romano – Head of Unit, Water Governance & Circular Economy – Organisation for Economic Co-operation and Development

Dr Warren Bowden - Managing Director - Scottish Leather Group

Espen Karlsen - Chief Executive Officer - Jernia

Dr Christoph Brüssel – Director of Senate of the German Economy

Climate Chamber Mission Programme

Tuesday 2 November

11:15am – 12pm

Designing out waste – the role of the circular economy and why being sustainable isn't enough

*A circular economy is based on the principles of designing out waste and pollution, keeping products and materials in use, and regenerating natural systems. (Chris Grantham)
Circular design is about creating products and services that no longer have a lifecycle with a beginning, a middle and an end.*

*The purpose is to design products that can “be made to be made again”, as well put by Tim Brow, IDEO CEO. There will be as result less waste and more value added to the ecosystem. However, it's not enough for something just to be sustainable. Products or services need to have other compelling features beyond sustainability for people to want to use them. To be worth the hassle of switching from an existing set-up, things must be able to compete on qualities such as cost, ease, speed, simplicity, aesthetics and service quality. (Ness Wright)
What does the future of the design profession look like?*

Dian Kurniawati - Founder & President Director - PT Tridi Oasis
Sarah Drummond – Board Member of Loch Lomond and The Trossachs National Park
Jim Woodger – Managing Director UK – LanzaTech
Peter Čas – Chief Executive Officer – Hrastrnik1860

12pm – 12:30pm

Lunch

Climate Chamber Mission Programme

Tuesday 2 November

12:30pm – 1:30pm

Green Finance

To highlight and showcase sectorial benefits in moving to a circular economy as part of the wider climate change ambitions to reach net-zero. Formatted as a panel conversation, this 45-minute session will inspire, share best practice, and raise awareness of the benefits of a circular economy to international businesses working within the sector.

“Finance has a critical role to play in building a more sustainable, healthy and resilient future. Scaling the circular economy helps to achieve this, while unlocking new and better growth opportunities for businesses of all sizes as they transition.”

Barry O’Byrne Chief Executive, Global Commercial Banking, HSBC

Moderated by Jon Curtis, Founder and CEO, Curtis & Associates

Jamie Butterworth – Partner - Circularity Capital

Francois de Maricourt – Chief Executive Officer – HSBC

Indonesia and Honorary Secretary of British Chamber of Commerce Indonesia

Jeffrey Chattelier – Founder and Chief Executive Officer - Forest Carbon

Bruce Fletcher – Group Chief Risk Officer – NatWest Group

Rahul Sheth, Global Head of Sustainable Debt Capital Market and Bonds, Standard Chartered

1:30pm – 2:15pm

Race to net zero – examining how businesses can deliver on their climate targets

There is an increasing recognition that the business world needs to play a central role in meeting net zero, as industrial activities are the biggest contributor to rising temperatures on the planet. The World Bank estimates that \$4 trillion of finance needs to be mobilised annually to invest in mitigation and resilience and most of this needs to be financed by the private sector.

As the engine of the global economy, business is uniquely placed to deliver the reductions needed to guarantee humanity a positive future. Embracing the zero-carbon transformation is already unlocking business and economic benefits: enhancing the competitiveness of industry, creating jobs, driving resilient economic growth, and protecting the health of citizens.

Fahmida Bangert – VP of Sustainability – ITRenew

Derek Provan – Chief Executive – AGS/Glasgow Airport

Stuart Chidley – Co-Founder – Beauty Kitchen

Greg Lucas – Sustainability Manager – IKEA

Climate Chamber Mission Programme

Tuesday 2 November

1:30pm – 2:15pm

Smart Cities – a new way to develop zero carbon communities
(IN PERSON ONLY)

Keynote: Philipp Späth – Partner at Drees & Sommer

David Lowen – Local Area Business Manager – Electrification at ABB

Dr Thomas Götzen – CEO at Animus

Andreas Viebrock – CEO at Viebrockhaus AG

Moderation: Götz Schönfeld – Head of Communication at Drees & Sommer

2:15pm – 3:45pm

B2B Meetings and Networking

Opportunity for businesses to meet individually with one another. B2B meetings can be organised two weeks prior to the mission, as well as during the two days. Meetings can also be organised outside of the event time – this will be the responsibility of each company.

3:45pm – 4pm

Closing remarks and summary of day

Clare English – Broadcaster and Host

Alison McRae – Senior Director – Glasgow Chamber of Commerce

5pm – 7:30pm

Site visit at Edrington, followed by an evening reception

Address:

Edrington
100 Queen Street
Glasgow
G1 3DN

Climate Chamber Mission Programme

Wednesday 3 November

HOST: Clare English

7:15am – 8am

Networking and Virtual Expo

8.15am - 9.45am

The pathway to greater sustainability: why are bold climate targets not always the answer?

With ambitious targets being set globally, what role can countries play and how do they create the enabling conditions and behavioural change to deliver. What more can be done to support this on the ground activity?

Dr. Curt Rice, Rector – Norwegian University of Life Sciences
Seth Siegel - Chief Sustainability Officer - N-Drip
Peter Godfrey - Managing Director - UK Energy Institute, Singapore
Dimitri Caudrelier – Chief Executive Officer – Quantis

10am – 11:30am

What role does the Circular Economy play for trade and economic diversification? What does the future look like?

As interest in circular economy approaches grows, it becomes increasingly important to ensure that trade policies are designed and implemented with the goals of a circular economy in mind. Not doing so would be a missed opportunity, given the unique role of trade to scale up circular economy solutions worldwide.

Moreover, disregarding the need to align trade policies with circular economy approaches risks reinforcing linear “takemake-discard” approaches. As a result, countries around the world may forego the potential benefits of moving towards a safe and efficient global circular economy, including better human health and environmental outcomes, higher productivity,

Helen Burdett – Lead Circular Economy Innovation and
Kimberly Botwright – Lead on Global Trade and Investment –
World Economic Forum
Dr Mathis Wackernagel, President of the Global Footprint
Network
Joanna Bonnett - Head of Sustainability and Group Treasury
and Steve Ingham – Chief Executive Officer - PageGroup
Juan Carlos Orozco Rodríguez - Chief Sustainability Officer -
CELSA Group

Climate Chamber Mission Programme

Wednesday 3 November

Panel Discussions

11:45am – 12:30pm

Food and Drink / Events and Conferences

To highlight and showcase sectorial benefits in moving to a circular economy as part of the wider climate change ambitions to reach net-zero. Formatted as a panel conversation, this 45-minute session will inspire, share best practice, and raise awareness of the benefits of a circular economy to international businesses working within the sector.

Mitchel Van Dooijeweerd – Sustainability Coordinator - Revolution Foundation
Craig Sterling – Chief Executive Officer – Cuantec
Élodie Parre – Group Sustainability Director – Bel

11:45am – 12:30pm

Low carbon and Renewables / Manufacturing and Engineering

To highlight and showcase sectorial benefits in moving to a circular economy as part of the wider climate change ambitions to reach net-zero. Formatted as a panel conversation, this 45-minute session will inspire, share best practice, and raise awareness of the benefits of a circular economy to international businesses working within the sector.

Moderated by Hazel Gulliver – Director of Engagement – ScottishPower

Kirsty McArthur – Director/Co-Owner - MacArthur Green
Azis Armand – Deputy President Director & CEO - Indika Energy
Felix Dane – Chief Executive Officer – Hendrik Ltd
Walter Kreisel – Chief Executive Officer – Neoom Group

11:45am – 12:30pm

The Race to Net Zero in China

12:30pm – 1:15pm

Break

1:15pm – 2pm

Built environment and Construction / Transport

To highlight and showcase sectorial benefits in moving to a circular economy as part of the wider climate change ambitions to reach net-zero. Formatted as a panel conversation, this 45-minute session will inspire, share best practice, and raise awareness of the benefits of a circular economy to international businesses working within the sector.

Moderated by Ainsley Mann – Scottish Trade Envoy to Indonesia

Siham Karim – Sustainability Analyst – CBRE Global Workplace Solutions
Poul Wendelhansen – Environment Manager - Balfour Beatty
Toby McCartney – Chief Executive Officer – MacRebur
Nick MacLean – Managing Director MENA Region – CBRE

Climate Chamber Mission Programme

Wednesday 3 November

1:15pm – 2pm

Green Housing – new technology to deliver zero carbon homes (IN PERSON ONLY)

Keynote: Marco Abdallah – Head of Engineering UK at Drees & Sommer

Markus Niedermayer, CEO at Kingspan Light + Air
Rainer Krings, CEO at Mendiger Basalt
Gerhard Oefter, Director at ZmartHaus

Moderation: Alex Altmann – Chairman at Chairman British Chamber of Commerce in Germany

2:15pm – 3pm

Fashion and Retail

To highlight and showcase sectorial benefits in moving to a circular economy as part of the wider climate change ambitions to reach net-zero. Formatted as a panel conversation, this 45-minute session will inspire, share best practice, and raise awareness of the benefits of a circular economy to international businesses working within the sector.

Moderated by Clare English

Anthony Burns – Chief Operating Officer – ACS Clothing
Yngvill Ofstad - Sustainability Manager - Bergans of Norway
Freya Burton – Chief Sustainability Officer – LanzaTech

2:15pm – 3pm

Electric Mobility (IN PERSON ONLY)

Keynote: Ashok Sridharan – Special representative Global Sustainable Economy and Former Mayor City of Bonn/Germany

Chris Meusburger, Project Lead a Fuel at Obrist
Porsche AG
Phoenix Contact AG

Moderation: Philipp Späth – Partner at Drees & Sommer

Climate Chamber Mission Programme

Wednesday 3 November
SUSTAINABILITY AND CIRCULARITY

3pm – 4:45pm

B2B Meetings and Networking

Opportunity for businesses to meet individually with one another. B2B meetings can be organised two weeks prior to the mission, as well as during the two days. Meetings can also be organised outside of the event time – this will be the responsibility of each company.

4:45pm – 5pm

Closing Remarks

Clare English – Broadcaster and Host
Richard Muir – Deputy Chief Executive – Glasgow Chamber of Commerce
Linzi Boyd – Founder – One Earth

5pm – 6:30pm

Drinks Reception in Scholars Restaurant (City of Glasgow College)

Delegate List

Speakers

Cllr Susan Aitken

Susan Aitken has been Leader of Glasgow City Council since May 2017 and is the first SNP Leader of the Council. For her work to deliver equal pay justice for thousands of women in the city, she was awarded Scottish Local Government Politician of the Year.

Under her leadership Glasgow has been named the host of COP26, a Global Green City, and the European Capital of Sport for 2023.

Susan has worked in a variety of policy and research roles in the Scottish Parliament and the third sector, and as a freelance writer and editor specialising in health and social care policy. She is a graduate of both Glasgow and Strathclyde Universities.

Derek Provan – Chief Executive – AGS/Glasgow Airport

Derek Provan joined AGS Airports, which owns Aberdeen International, Glasgow and Southampton airports, as Chief Executive Officer (CEO) on 16 April 2018.

As the second-largest airport group in the UK, AGS carried over 15 million passengers in 2018 and directly supports approximately 10,000 jobs.

Born in Glasgow, Derek has over 20 years' experience in aviation and joined AGS from Heathrow, Europe's largest airport, where he was latterly Chief Operating Officer.

During his time at Heathrow, Derek also held the position of Director, Future Heathrow. He was responsible for the future design of an expanded Heathrow to include surface access, terminals, airfield and airspace design and the creation of the hub's master plan and future operating models.

Derek joined Heathrow in 2013 having spent three years as Managing Director of Aberdeen International Airport. Derek started his aviation career in 1998 at Glasgow Airport where he went on to hold a series of senior roles. He has a BSc in Fire Risk Engineering, Masters Degrees in Risk Management and Business Management and Research.

Derek is a founding member of the Performance-Based Regulation Industry Group working with the CAA to ensure that the industry forms an integral part of future regulation in UK Aviation. He holds a number of positions outwith AGS Airports including Council Director with Glasgow Chamber of Commerce, member of the Airport Operators Association's board and a member of the Department for Transport's Aviation Security Council.

Keith Anderson – Chief Executive Officer – ScottishPower

Keith is Chief Executive Officer for Scottish Power and he also sits on the Scottish Power Board, where he was appointed in February 2012.

Keith has full responsibility for the Company's activities in the UK including the £5.3bn investment plan to 2022 designed to strengthen the position of the Company as the Utility of the Future.

Prior to joining Scottish Power, Keith had worked with some major financial institutions including The Royal Bank of Scotland and Standard Life, as well as working as a management consultant with Ernst & Young.

Oriana Romano – Head of Unit, Water Governance & Circular Economy – Organisation for Economic Co-operation and Development

Oriana Romano is the Head of Unit, Water Governance and Circular Economy, Urban Policies, and Sustainable Development Division of the OECD Centre for Entrepreneurship, SMEs, Regions and Cities.

In 2018, she initiated a Programme on the Economics and Governance of Circular Economy in Cities, which supports cities and regions in developing and implementing circular economy strategies.

She spearheaded the work on Water Governance in Cities, and on Blue Cities. Before joining the OECD in 2013, she was research assistant and university lecturer in Environmental Economics at the "Centre for International Business and Sustainability"(CIBS), London Metropolitan University (London, United Kingdom) and the Department of Social Science of the University "L'Orientale"(Naples, Italy).

She holds a Ph.D in "Institution, Economics and Law of Public Services"

Poul Wendelhansen – Environment Manager – Balfour Beatty

Poul is an environmental and sustainability scientist with over 22 years of experience working in the real estate, infrastructure and construction sectors, leading sustainability and delivering environmental management. His experience has been gained across the whole infrastructure and property value chain and across all management levels of global business.

In Scotland, Poul is leading the business to identify opportunities to work with our customers, government departments, industry groups and other organizations on solutions to the challenges of climate change, biodiversity and social value that improve outcomes for our customers and reduce the impacts of our activities.

Marc de Wit – Director of Strategic Alliances – Circle Economy

Marc de Wit is Director Strategic alliances at Circle Economy, an impact organisation that guides businesses, cities and nations towards adoption of a circular system.

Marc is a recognized thought-leader on implementation of the circular economy. In 2018 he initiated the Circularity Gap Report: an annual yardstick for the circular state of the global economy.

He brings nearly 15 years of strategy and implementation experience in advising companies and governments in developing circular strategies and implementing circular solutions.

Fahmida Bangert – VP of Sustainability – ITRenew

With 20+ years of industry experience, Fahmida leads sustainability initiatives for ITRenew, specializing in a circular economy model for data centers in partnership with global hyperscalers. She spearheads cross-functional efforts to assess the company's carbon impact and solutions to integrate sustainability and circularity in all aspects of the business and frameworks.

Prior to returning to high tech in 2021, Fahmida directed Stanford University's Office of Sustainability (sustainable.stanford.edu) for 13 years for programs in infrastructure, resource efficiency, reporting, business digitization, individual engagement, and research integration to foster 'university as a living lab'. Fahmida is a guest Lecturer at Stanford University and mentor to countless students and graduate researchers.

Before Stanford, she was the founding director at UC Berkeley, where she built its first climate action program and a model for the University of California system. Fahmida earned a B.A. in Economics from Smith College and a Master's in Environmental Science and Management from the Bren School at the University of California, Santa Barbara.

Toby McCartney – Managing Director – MacRebur

A successful entrepreneur and environmentalist, Toby McCartney is passionate about 'disrupting for good'. Co-founding waste plastic road company MacRebur in 2016, Toby set about the task of eliminating plastic waste after attending his six-year-old daughter's school assembly. When asked what lives in our oceans, Toby's daughter answered: "waste plastics". From then on, Toby has made it his mission to help resolve the plastic epidemic.

Making a conscious effort to make a difference in all aspects of life - from wearing trainers made from waste plastics taken from the ocean, to founding multiple charities in the UK and abroad - Toby is excited to be able to play a part in helping create a better world for future generations.

Processing waste plastics destined for landfill or incineration and adding them into asphalt for road construction, MacRebur helps to solve two world problems: the waste plastic epidemic, and the quality of road surfaces. Each km of road laid using MacRebur's product uses up the equivalent weight of 740,541 single use plastic bags.

First founded in Lockerbie, Scotland, Toby has gone on to substantially grow the business, with MacRebur roads now being laid around the world – from the US and Brazil, all the way to South Korea and Australia.

Katie Murray – Chief Financial Officer – NatWest

Katie Murray is the Group Chief Financial Officer of NatWest Group since January 2019. Prior to her current role, Katie has held senior roles within the Group as Director of Finance and Deputy CFO.

Katie is a Chartered Accountant with over 30 years experience covering all areas of financial services, including capital management and investor relations. Katie was previously the Group Finance Director for Old Mutual Emerging Markets, based in Johannesburg, having held various roles across Old Mutual since 2002. Prior to this, Katie worked at KPMG for 13 years.

Katie is the executive sponsor seeking to deliver enhanced financial outcomes for their clients through increasing their financial capability. She is committed to achieving a diverse and inclusive workforce and is an advocate of the various employee-led networks in the Bank. Outside of work, she is involved in the 25x25 group, an initiative to increase diversity in business leadership. She is a passionate member of A4S, The Prince of Wales' charitable organisation where she is driving the climate change agenda via the Finance Directors office.

Jamie Butterworth – Partner – Circularity Capital

Jamie Butterworth is one of the founding partners of Circularity Capital, a specialist investment firm supporting the growth and innovation of businesses in the circular economy.

Jamie is the former CEO and part of the founding team of the Ellen MacArthur Foundation, a global hub for circular economy innovation. He was also instrumental in developing and launching the Circular Economy 100, a platform for multinationals, SMEs, academic institutions and municipalities to capture the commercial opportunities of the circular economy.

Jamie is a business fellow of Oxford University's Smith School, a member of the Advisory Board of the Accenture Circularity Accelerator and has contributed to a number of forums on the circular economy including at the World Economic Forum and the European Commission Resource Efficiency Platform.

Helen Burdett – Lead – Circular Economy Innovation – World Economic Forum

Helen Burdett leads the World Economic Forum's work on circular economy. Her portfolio includes Scale360°, which advances innovation ecosystems for environmental and economic impact with scalable, locally-led innovation support delivered through private-public partnerships--all connected through a global digital community.

In addition to her academic and research background at Georgetown University, Helen has 10 years of experience in strategy and operations consulting, international development, and software development. Prior to joining the Forum, she was a Director at Globality, a SoftBank-funded scale-up bringing digital transformation and artificial intelligence to the procurement industry.

Stuart Chidley – Co-Founder of Beauty Kitchen & Return•Refill•Repeat

Stuart Chidley is a circular economy expert and co-founder of Beauty Kitchen, the highest scoring B Corp in the UK beauty industry. Co-founded in 2014 with his wife Jo, they have set out to change the face of the beauty industry by creating the most effective, natural, and sustainable beauty products in the world.

Widely regarded as one of the pioneers of sustainable beauty, Stuart & Jo are championing a Reuse Revolution through sustainable innovation by implementing Cradle to Cradle design into Beauty Kitchen's circular approach. Among their achievements and award accolades, they have been instrumental in developing the world's first closed-loop solution for beauty packaging and have powered the service behind the ground breaking Return•Refill•Repeat programme & Refill Stations. Thanks to their leadership, Beauty Kitchen is recognised on the UK's 50 Most Disruptive Companies list and has won numerous industry awards, including 'Who's Who in Natural Beauty'.

Peter Godfrey – Managing Director – APAC – ENERGY INSTITUTE

Based in Singapore, Peter is the chief representative of the Energy Institute (EI) in the Asia Pacific region. In addition to his role with the EI, Peter has also worked as an independent advisor, consultant and executive coach to a number of organisations and governments agencies on issues related to the energy sector development within the context of the energy transition and decarbonisation and their strategic implications.

Particular areas of focus of Peter's work include the promotion of resource and operational efficiency through creating a more "circular economy" and recognition of the need to incorporate a more holistic, whole value-chain approach, to dealing with Scope 3 emissions.

Peter is also actively involved in activities related to promoting the need for, and accelerating the development of, Carbon Capture and Storage (CCS) projects, the development of the Hydrogen Economy and the decarbonisation of the hydrocarbon refining and petrochemicals sectors. Within this context, Peter has recently taken on the role of Senior Regional Advisor of STOREGGA, a leading UK based independent company that is entirely focused on pioneering carbon reduction and removal solutions.

Anthony Burns – Chief Operating Officer – ACS Clothing

Anthony Burns is the COO of ACS, an internationally recognised business, which empowers fashion retailers and brands to strategically embed, and easily embrace, circular business models.

Under Burns' leadership, ACS has been transformed into a circular fashion enterprise with clothes rental offerings for woman, men, children and babies. The company has already achieved zero waste to landfill, carbon neutrality, and are working towards net zero emissions.

Anthony has expanded the company's expertise into garment refurbishment where they transform clothes normally deemed unusable by retailers, into clothes as good as new, which can be resold, and their lifespan significantly increased. Under his leadership, ACS has received recognition as nominees and winners of renowned sustainability awards - including Vibes and Drapers.

Burns has focused the business on a social responsibility agenda, by becoming an accredited Living Wage provider, being a disability confident employer and signing the race at work charter. ACS has also been awarded for its employee health and well-being initiatives and is currently working towards B- Corp status.

Anthony Burns' mission is to improve the sustainability of the fashion industry, and be more socially accountable, while increasing ACS's turnover by 10-fold within 5-years.

Craig Sterling – Chief Executive Officer – CuanTec

Craig is CEO of CuanTec, LTD, based in Oban, Scotland. CuanTec is working with fisheries and natural food sources to maximise the value of all they harvest to reduce the impact that food waste and plastic pollution have on our world. CuanTec's mission is to replace plastics with natural and compostable CuanSave packaging and replace harsh chemicals with natural BioChitin-based solutions.

Craig's rich career history allows him to bring valuable knowledge and skills to CuanTec and aligns perfectly with CuanTec's ethos of "Using waste to eliminate waste naturally". Coming to Scotland from California, Craig has held leadership positions with key businesses throughout his career in the Life and Material Sciences sectors. He has experience in founding businesses, Product and Business Development, technology acquisition, global licensing, as well as leading several successful products launches technologies across global markets.

In his personal life, Craig enjoys lots of outdoor activities including, hiking, skiing, diving and paddle boarding. These hobbies led to his natural love and appreciation of the environment, including active participation in environmental causes such as Friends of Ballona Wetlands; an organisation for the restoration and protection of wetlands and Heal The Bay, both in the Los Angeles area.

Curt Rice – Rector of Norwegian University of Life Sciences

Curt Rice is the Rector (President/Vice Chancellor) of the Norwegian University of Life Sciences, a position which he has held since August 1, 2021. Prior to that, he was in the same position at Oslo Metropolitan University from 2015 – 2021. He also served as the Pro Rector for Research at the University of Tromsø, where he had been on the academic staff since 1993. Rice also leads Norway's Committee for Gender Balance and Diversity in Research.

The Norwegian University of Life Sciences has a strong and pervasive focus on sustainability, ranging from sustainability issues related to climate and health, to agriculture and the organization of cities and societies. For more information, please see <https://www.nmbu.no/en>.

Dian Kurniawati – Founder and CEO of PT Tridi Oasis Group

Dian is responsible for the overall business operations of Tridi Oasis besides production. She comes from an Engineering and Management educational background with more than 8 years' of experience in business consulting with global companies across various industries.

With a passion for social and environmental issues, Dian's long-term vision for Tridi Oasis is to turning trash into jobs and useful products. She thinks the biggest problem we face as a species today is multidimensional poverty, and to end it, we need to invest in the under-privileged to create as many sustainable jobs as possible.

Jeffrey Chatellier – Chief Executive Officer – Forest Carbon

Mr. Chatellier is a conservation scientist and the CEO of Forest Carbon, a forest restoration and conservation company with offices in Jakarta and Singapore. Mr. Chatellier has advised major Indonesian corporations, international firms, multilateral institutions, governments and environmental organizations on conservation finance, forestry, and sustainability for over 10 years in Southeast Asia.

As the Investment Director for Forest Carbon's Sumatra Merang Peatland Project, Mr. Chatellier has established a proven business model for large-scale wetland forest restoration. Launched with a \$6 million investment from the UK-based Althelia Climate Fund, the project has now secured long term sales contracts to major global brands to fund project operations across more than 22,000 hectares. Mr. Chatellier designed the project, which reduces the risk of fire, restores a habitat for endangered species, strengthens local communities and delivers returns for investors and partners.

In 2020, Mr. Chatellier closed a series A investment round for Forest Carbon from AXA Investment Managers, securing an \$11 million package of equity and debt to launch new projects in Indonesia. Mr. Chatellier is now focused on growing the company to accommodate rising demand in the natural climate solutions sector, with the objective of protecting 250,000 hectares of mangrove, peatland and tropical forest areas by 2025.

Mr. Chatellier holds a BA in International Affairs from George Washington University and a Master of Environmental Science (MESc) from Yale University. He has published a book on mangrove ecosystems in West Africa and is a former Fulbright Research Scholar at the Institute of Technology Bandung in Indonesia. He is fluent in Bahasa Indonesia, French, and Mandinka

Azis Armand – Vice President Director – Indika Energy

Azis Armand was appointed as Vice President Director and Group CEO of Indika Energy, a company that has committed to a net-zero carbon emissions goal by 2050, since April 2020 and initially joined as Director in 2007. Currently, he also holds positions as Commissioner and Director of various subsidiary companies within Indika Energy Group.

He has more than 10 years of extensive experience in Corporate Finance and Investment. He was previously employed as a Rating Manager at PT Pemeringkatan Efek Indonesia and Associate at JP Morgan Chase. Recently, he was just appointed as Vice Chairman of the Indonesian Chamber of Commerce and Industry (KADIN Indonesia).

Kirsty MacArthur – Director/Co-Owner – MacArthur Green

Kirsty is a Director and co-owner of Glasgow based environmental consultancy, MacArthur Green.

MacArthur Green is focussed primarily on supporting renewable energy projects, whether onshore or offshore. The team provide ecology, ornithology and hydrology advice to both developers and stakeholders.

MacArthur Green is working hard to reduce their carbon footprint. They have planted almost 30,000 trees at their very own native woodland site in Argyll in 2019. This woodland will sequester 10,000 tonnes of CO₂ over the next 100 years, and MacArthur Green are managing it carefully to enhance biodiversity.

A qualified lawyer, Kirsty formerly worked for Pinsent Masons LLP, during which time she was seconded to ScottishPower Renewables' legal team for a year. She maintains her interest in the law through her work as a reserve Commercial Contracts Tutor at Glasgow University.

Seth Siegel – Chief Sustainability Officer – N-Drip

Seth M. Siegel, N-Drip's Chief Sustainability Officer, is a writer, lawyer, activist, and serial entrepreneur. Seth is the author of the award-winning, critically acclaimed New York Times bestseller *Let There Be Water: Israel's Solution for a Water-Starved World*, which is now in print in 20 international editions representing more than 50 countries. He is also the author of *Troubled Water: What's Wrong with What We Drink*, a widely praised book that sets forth an ambitious agenda for a fundamental rethinking of America's drinking water system. Seth's motivational book, *Other People's Words: Wisdom for an Inspired and Productive Life*, reflects a lifetime of collecting inspirational quotations. All three were published by Macmillan publishing's St. Martin's Press.

His essays on water and other issues have appeared in *The New York Times*, *The Wall Street Journal*, the *Los Angeles Times*, the *Washington Post*, and in leading publications in Europe and Asia. Seth is a Senior Fellow at the University of Wisconsin's Center for Water Policy. He is also a member of the Council on Foreign Relations.

Seth has spoken on water issues at hundreds of venues on four continents. Among the places he has spoken include the US Congress, the United Nations, the World Bank, Davos and at Google's headquarters, on more than 40 college campuses, including Harvard, MIT, Princeton, Yale, and Stanford—and during the Coronavirus lockdown, to dozens of others via video. He is a graduate of Cornell University and the Cornell Law School, and was a graduate student in international relations in Jerusalem.

Seth is the co-founder of several companies, including Beanstalk, the world's leading trademark brand extension company, which he sold to Ford Motor Company. He was also a Producer of the Tony Award-nominated Broadway revival of *Man of La Mancha*. Seth sits on the board of several not-for-profit organizations. Among other recreational pursuits, Seth is an avid ping pong player.

All of the royalties from sales of Seth's books are donated to charity.

For more information, visit www.SethMSiegel.com. You can connect with Seth on Twitter @SethMSiegel.

Peter Cas – Chief Executive Officer – Hrastnik1860

Mr. Peter Čas graduated with master's degree from the Faculty of Mechanical Engineering, University of Ljubljana and later perfected his knowledge in business and economics at the IEDC - Bled Business School. Before joining glass manufacturing company Steklarna Hrastnik in Slovenia as CEO, Mr. Peter Čas was leading career in production-based companies where he gained unparalleled experience in the technical space, while also establishing himself as a respected leader. His key strategic goals are achieving operational excellence and EBITDA margin improvements, setting a new standard for how to transform companies from traditional to modern while having strong and innovative commitments towards social and environmental responsibility. Under his leadership, Steklarna Hrastnik increased its investments in latest and cleanest technologies in order to consolidate its position in the niche segment of the highest quality glass packaging. His speaking engagements in the industry are very insightful, especially when he speaks about industrial use of hydrogen as energy source on the upcoming digital conference.

Dr Warren Bowden – Innovation and Sustainability Director – Scottish Leather Group

Dr Warren Bowden is a Chartered Environmentalist & the Scottish Leather Group's Head of Sustainability and Innovation. A Fellow of the Society of Leather Chemists and Inventor of the pioneering and patented Thermal Energy Plant, Dr Bowden has spent the past 18 years of his 25-year career within the sector leading the multi award winning Sustainability agenda through circularising leather manufacture, to net zero. Additionally, Warren is a circular "ambassador" and Director of Leather UK.

Scottish Leather Group is the largest producer of leather in the UK, specialising in the sustainable manufacture of upholstery leathers, for automotive, aeronautical, mass transit and other leather-goods markets.

Jon Curtis – Founder and Chairman of Curtis & Associates Ltd

Jon Curtis is the Founder and Chairman of Curtis & Associates Ltd, based in the Isle of Man, United Kingdom.

The C&A Group Companies have been providing Data Acquisition, Transfer, Management and Visualisation solutions to the Energy Sector for over 30 years. For more information, please visit www.curtisassociates.com

In 2005, at the time of the Kyoto Protocol, the C&A Group created in Indonesia an Agro-Forestry project through the company PT Goldteak. Thanks to the carbon sequestration from the tree plantations, the Group is very proud of the fact that it reached Net Zero in 2020, and is now increasingly Carbon Negative. PT Goldteak will be at the COP26 Climate Chambers as one of the companies participating with BritCham Indonesia. Please visit www.goldteak.com for more details.

The electronic tagging and verification of the project carbon sequestration is being managed by the latest C&A start-up company New Energy Matrix, who are focused on the use of Blockchain for the monitoring of Net Zero Targets. New Energy Matrix Srl. will also be at the COP26 Climate Chambers as one of the companies participating with the British Chamber of Commerce Italy. For more details please visit www.newenergymatrix.com.

Jon Curtis will be on hand throughout the COP26 Events in Glasgow.

Jon holds a Master's Degree from Oxford University where he studied Metallurgy and Materials Science 1971 - 1975

Bruce Fletcher – Group Chief Officer – NatWest

Bruce is the Group Chief Risk Officer, a position he has held since October 2018. Bruce is responsible for leading the Risk function, defining and overseeing the risk, conduct, compliance and financial crime strategies for the Group, and encompassing policy, governance, frameworks, analysis and insights.

Bruce is also involved in a number of industry activities. He is a Non-Executive Director of the Professional Risk Managers' International Association (PRMIA), which is a non-profit professional association operating with chapters in 46 cities around the world. He serves on the Financial and Risk Policy Committee of UK Finance, and represents the Group on the Bank of England's Climate Financial Risk Forum.

Over a 35 year career Bruce has worked in commercial and retail banking in both the UK and USA, specialising in Risk Management. Prior to his current role, Bruce served as a Group General Manager at HSBC, where he was the Chief Risk Officer for the Global Retail Banking and Wealth Management Business. He previously served as their Chief Risk Officer for Europe, with responsibility for managing risk across a diversified set of businesses which operated in 19 countries, and acted as a Non-Executive Director at several of their businesses in Turkey, Bermuda and the UK.

His career includes 17 years at Citibank; in his final role he was Managing Director and Senior Credit Officer in their Global Consumer Credit and Fraud Risk Management Office. Over a five year period he oversaw a range of international businesses and product lines, and helped to integrate a number of acquisitions.

Rahul Sheth – Global Head of Sustainable Debt Capital Markets – Standard Chartered

Based out of Singapore, Rahul Sheth is an Executive Director in Standard Chartered's Capital Markets Team. In his role, he globally heads the Sustainable Bonds product and has been responsible for leading pioneering and award-winning green, social and sustainability bond transactions for clients across the bank's footprint.

With 14 years of banking experience spanning Debt Capital Markets and broader financial markets, he has held senior roles across origination and structuring and client advisory. In his current role, he advises governments, supra national entities, corporates and FIs on setting up Sustainable finance frameworks to enable access to ESG focussed investors, across a wide range of capital markets products including green, social, sustainability, sustainability Linked and Transition bonds.

He maintains an active dialogue with ESG focussed funds, regulators and organisations such as the Climate Bonds Initiative, ICMA, ASIFMA, HKFA and others. He is a regular speaker and author on sustainable finance forums. Prior to joining Standard Chartered in 2010, Rahul worked with Bank of America Merrill Lynch in the Fixed Income Structured Solutions team in Australia, and prior to that, with Citibank.

Rahul holds a master's degree in business administration from the Indian Institute of Management, Ahmedabad, Business Sustainability Management from the Cambridge Institute for Sustainability Leadership and is a Chartered Accountant from the Institute of Chartered Accountants of India.

Francious de Maricourt – President Director – PT Bank HSBC Indonesia

Francois de Maricourt is the President Director of PT Bank HSBC Indonesia since August 2020. Francois joined HSBC in 1994 and has been appointed in a number of senior leadership roles since joining the bank. He has more than 25 years of experience in banking spanning across various geographies in Europe, Asia, the Middle East, and Africa. His last role was CEO for HSBC Bangladesh and also a board member of HSBC Mauritius.

Francois oversees the whole HSBC Group operations in Indonesia that spans over 58 branches and 3300 staff in more than 21 cities.

Francois holds a Post Graduate Degree in Banking and Finance with academic distinction and a master's degree in economics. Francois is also an established writer having contributed numerous articles in finance and economics for leading publications. Francois is married and has four children.

David Ingram – Chief Procurement Officer Head of Unilever Asia (UAPL)

Having joined the business in 1989, Dave has worked in the UK, Mexico, Shanghai, Singapore and The Netherlands during his 30-year career with Unilever. His extensive experience spans supply chain operations, including procurement, manufacturing, logistics and planning.

Dave was appointed Chief Procurement Officer in April 2019, based in Singapore, and also assumed the role as Head of Unilever Asia (UAPL). He is responsible for the procurement of all goods and services globally, supporting the creation of over 400 brands sold in over 190 countries. Dave is also tasked with delivering ambitious sustainable sourcing strategies as part of Unilever's Compass strategy and Climate & Nature commitments. Prior to these appointments, Dave was a member of the Unilever European Executive and the Global Supply Chain leadership teams, responsible for the European Supply Chain.

Additionally Dave was responsible for the Global Planning organisation and in developing the strategy for the Digital ReWire of the Supply Chain function.

Sarah Drummond – Board Member – Loch Lomond & Trossachs National Park

Sarah is a design leader, with a specialism in service and strategic design focusing on balancing the needs of people and planet. She co-founded Snook, an award winning design studio and led the company as CEO for over 12 years.

Sarah was given an honorary doctorate from the Glasgow School of Art for services to design in 2019, awarded a Google Fellowship for her work in technology and democratic innovation and was named as Good magazine's 100 extraordinary individuals tackling global issues in creative ways for CycleHack, an initiative to reduce barriers to cycling.

She currently focuses on making films focusing on LGBTQ+ history, food sovereignty and climate crisis and is a board member of Loch Lomond and Trossachs National Park, WithYou a mental health charity, Settle a charity dedicated to tackling the causes of youth homelessness and New Field, a charity teaching young people to use natural materials and new tech to make products for a post-plastic world.

Mitchell van Dooijeweerd – Sustainability Manager – Revolution Foundation

Mitchell van Dooijeweerd is Sustainability Manager at the globally renowned DGTI Festival, and their Revolution Foundation (Netherlands).

He provides sustainable and circular systems for festivals, events, and organisations, to provoke a radical shift in the behaviour of event-goers, partners, businesses, and governments.

Their projects are a pioneering demonstration of transition to circular systems – a new economic paradigm, in which we distance ourselves from the 'linear' (take-make-waste) era – without compromising on quality or experience.

Steve Ingham – Chief Executive Officer – PageGroup

Steve leads PageGroup, a worldwide leader in specialist recruitment. As one of the most successful and longest serving CEOs on the FTSE 250, he has more than trebled the company's turnover and profits since taking the helm in 2006.

Steve's career with PageGroup spans over three decades. When he joined, the company had just 240 staff in three countries. Driven to create opportunity for people, regardless of location or background, he has played an integral role in building a truly global business with a head-count of over 7,000 employees across 37 countries.

With an engineer's mind, Steve has always been firmly focused on building a business that works for everyone and has always taken a hands-on leadership approach. Steve has a degree in Metallurgy and Material Science.

Steve is also chairman of the development board for Back Up Trust, a spinal cord injury charity.

Joanna Bonnet – Global Head of Sustainability – PageGroup

Joanna leads the Sustainability and Treasury functions at PageGroup, a worldwide leader in specialist recruitment. PageGroup has over 7,000 employees operating in 140 global offices.

As Global Head of Sustainability Joanna is the driving force behind the Sustainability@Page initiative. In doing so, she has set corporate pledges, linking the overall PageGroup commercial strategy to UN Sustainable Development Goals and the UN Global Compact. In years to come, she will be remembered for reducing social inequalities and barriers to employment through social impact initiatives. To this end, she has set the target to change over one million people's lives within ten years. And has set PageGroup the ambitious target to become operationally carbon net-zero within five years.

As Group Treasurer Joanna is also responsible for the debt and liquidity, investments, transactional banking and the insurance programmes for the Group. Combining her dual responsibility, she has implemented sustainably linked debt facilities and an ESG compliant investment portfolio on behalf of the Executive.

Outside of work Joanna volunteers' significant amount of time to mentoring the next generation and is an elected council member governing a professional qualification association.

Dimitri Caudrelier – Chief Executive Officer – Quantis

Dimitri Caudrelier guides top companies in their transformation to become sustainable businesses. Dimitri is the CEO of Quantis, a leading sustainability consulting firm known for its science-driven approach for developing innovative sustainability strategies and solutions.

Active in environmental sustainability since 2008, Dimitri specializes in sustainability strategy, innovation, ecodesign and environmental assessments. He has advised numerous top businesses on their environmental strategies, including L'Oréal, Coty, Chanel, The Estée Lauder Companies, Danone, Remy Cointreau, AccorHotels, Nestlé, Eurazeo, Sycomore, IFF, Firmenich, Pernod Ricard, Sanofi, Savencia and Veolia.

He facilitates the Sustainable Packaging Initiative for Cosmetics (SPICE), a multi-stakeholder group co-founded by Quantis and L'Oréal uniting 25 cosmetics organizations to shape the future of sustainable packaging in the beauty industry.

Dimitri is driven by a vision to connect problems with solutions and design a new world where businesses operate within the planet's boundaries while elevating society's foundation.

An avid sailor, Dimitri led an expedition around the world, interviewing innovative companies in sustainability, co-authoring the book "100 pioneers for the planet" published by JC.Lattès. Dimitri is an engineering graduate of the Ecole polytechnique fédérale de Lausanne (EPFL) with a specialization in environmental studies, and he holds an Executive MBA from ESSEC Business School.

Greg Lucas – Sustainability Manager – IKEA

Greg Lucas is the Country Sustainability Manager for IKEA UK & Ireland, responsible for all aspects of the retailer's People & Planet Positive strategy. To fulfil our vision and become People & Planet Positive by 2030, our current focus areas are: to become a fully circular and climate positive business by 2030, enable the many people to live healthier and more sustainable lives within the limits of one planet, and by 2030, to create a positive social impact for everyone across the value chain. He has worked for 15 years in various sustainability roles with a specialism in developing a circular economy.

Paul Little – Principal / Chief Executive – City of Glasgow College

A Harvard Business School graduate and distinguished academic, he brings a wealth of experience in tertiary sector transformation, curriculum innovation, and performance excellence. Recognised with five Fellowships, including the Royal Society of Edinburgh, he is the current President of the Glasgow Chambers of Commerce, and most recently was appointed to the senior rank of Honorary Captain in the Royal Navy Reserve.

Over the last 32 years Principal Little has successfully led and reshaped five UK colleges, earning an international reputation as a visionary reformer, successful change agent, merger specialist and a much sought after thought leader in redefining college education. As Ambassador for WorldSkills in Scotland he has overseen the creation of a World Skills Academy and the college's consistent top two ranking in the UK. An advocate for vocational excellence, he firmly believes these competitions help to improve skills levels and deliver economic growth.

He is co-author of the Scottish Government commissioned Cumberford-Little report which highlights the strength, potential and economic impact of the college sector in Scotland. The Report was widely praised by the college sector, and employers, for identifying the priority of college provision based on both learner and employer demand. Its recommendations were also endorsed by the UK Independent Commission on the College of the Future, in its Scotland specific report.

Throughout an exemplary career, Principal Little continues to believe passionately that education is the great enabler, boosting social mobility, and providing unrivalled access to higher and further education for all, not just for the few. He introduced the college purpose to Let Learning Flourish to reinforce that students be placed at the heart of everything the college does.

Dr Mathis Wackernagel – President of the Global Footprint Network

Dr. Mathis Wackernagel created (with Bill Rees) the footprint concept in the early 1990s, with the carbon footprint now being the most popular variant. In 2003, he also founded Global Footprint Network, a sustainability think-tank, most known for its annual Earth Overshoot Day. His honors include the 2018 World Sustainability Award, the 2015 IAIA Global Environment Award, and the 2012 Blue Planet Prize.

Hazel Gulliver – Director of Engagement – ScottishPower

Hazel is Director of Engagement with ScottishPower, part of the Iberdrola Group. Working in the SP Corporate Affairs team, her role sees her liaising with a variety of stakeholders, both internal and external, on issues of interest to all of SP's business areas. She currently has a particular focus at the moment on how we can achieve a green recovery from the Covid crisis, as well as on ScottishPower's role as a Principal Partner for COP26, taking place in its home city of Glasgow later this year.

Walter Kreisel – Chief Executive Officer – neeom

ENTREPRENEUR, LEADING FIGURE OF THE ENERGY TRANSITION, PASSIONATE MOUNTAINBIKER AND FATHER OF TWINS.

He inspires. He motivates. He fills the audience with enthusiasm and encourages reflection. Walter feels confident that we can “electrify” the world with renewable energies. He demonstrates this every day anew as a successful entrepreneur leading a highly motivated team. As a visionary and passionate advocate of the energy transition, Walter illuminates the past, questions the status quo and – in his very unique and fascinating way – points out to solutions that seem immediately achievable and economically viable.

Jim Woodger – Managing Director – LanzaTech (UK)

Jim Woodger is the Managing Director of LanzaTech UK, a subsidiary of LanzaTech Inc headquartered in Chicago, USA. Jim is an environmental chemical engineer, who started his career with Honeywell-UOP, with roles in R&D, Engineering and 5 years commissioning oil refineries around the world. He was a founding member in 2007 of UOP's Renewable Energy & Chemicals business unit that commercialized the UOP HEFA Green Jet & Green Diesel technology. In 2012, Jim joined Solazyme in California to undertake business development activities for sustainable products made from algae. Since Corbion's acquisition of Solazyme in 2017, Jim has been responsible for the growth of Corbion Algae Ingredients into animal feed, oil & gas, and personal care. Jim recently joined LanzaTech to scale-up the UK team and drive forward numerous projects based on LanzaTech's Gas Fermentation and Alcohol-To-Jet technologies.

Felix Dane – Chief Executive Officer – Hendrik Ltd.

Felix Dane is Founder and Director of Hendrik Ltd. The company aims to design and manufacture hydrogen-powered compact utility vehicles (ATVs/UTVs) for the agricultural and recreational sports markets. Hendrik Ltd. is in the early stages, forming partnerships with research institutions, hunting for pre-seed capital, and working towards developing an MVP. Felix's interest in sustainability and climate change has been long-standing, from his work on development policy at the European parliament, to leading the Latin American Climate Change and Energy Office for the Konrad Adenauer Foundation (KAS). He served at KAS for many years, holding several posts around the world, working mainly in politics, security, energy and climate.

He holds a Master's Degree in European Studies from the LSE and is fluent in English, German, Portuguese and French, with an intermediate level of Spanish. Felix completed his military service in the German Airforce.

Dr Christoph Brussel – Director – Senate of the German Economy

Dr. Christoph Brussel is Chairman of the Board of the Senate of Economy Foundation. He studied law and politics and made a PhD in media economics 1990 while working. He worked as a correspondent and presenter on radio and TV. Later, as media entrepreneur, he produced well-known talk shows for SAT.1, game shows for RTL and Saturday evening shows for ARD as well as German-American TV films that were broadcast in more than 30 countries.

In politics he has been active in various CDU functions for more than 35 years.

Internationally he is a member of the board of the Senate of Economy Europe.

Kimberly Botwright – Lead on Global Trade and Investment – World Economic Forum

Previously, Kimberley worked at the International Centre for Trade and Sustainable Development (ICTSD,) and the Organisation for Economic Co-operation and Development (OECD). Kimberley holds an M.A. in European Economics and Policy from l'Institut d'Etudes Politiques de Paris (Sciences Po), a Masters in Executive Leadership, and a B.A. from the University of Oxford. She is fluent in English and French, and is a citizen of the UK and Switzerland.

Ainsley Mann – Swire Pacific and Scottish Trade Envoy to Indonesia

A versatile senior business leader with over twenty years' experience in Asia covering logistics, food & beverage, consumer product trading and distribution as well as the commercial & industrial real estate sectors. Strong focus on start-up operations, managing joint ventures, general management, business development, Government relations and capability development. Ainsley is also an active member of Glasgow's Chamber's President Network and a Scottish Trade Envoy to Indonesia.

Siham Karim – Sustainability Analyst CBRE GWS – Italy

Siham Karim holds a Master's degree in Environmental & Sustainability Engineering at the University of Padova, with a dissertation on circular economy in developing countries. She just started working as a Sustainability Analyst at CBRE GWS TD in Italy, after being trainee in Environmental, Health and Safety team at CBRE GWS TD.

She is helping CBRE implementing environmentally sustainable best practices for the company operations and assisting CBRE customers in their efforts to address their environmental concerns. Being a sustainable business is an essential element of how we operate. One of her first projects will be the improvement of the waste management processes in the company.

Nicholas MacLean – Managing Director – CBRE Middle East

Nicholas Maclean lives and works in the United Arab Emirates and is Co-Chairman & Managing Director of CBRE Middle East Region which he established in 2005. This Region encompasses his firm's operations across Middle East and North Africa. He is a member of the Advisory Council of the Dubai International Chamber

He is a GlobalScot; is Scotland's Trade Envoy to the United Arab Emirates; and Chairman of the Lillian Sutton (SoC) Charitable Trust.

A Fellow of the Royal Institution of Chartered Surveyors, he is the Interim Chair of the RICS World Governing Council, having previously been a Member, then Chairman, of the RICS MENA Board.

Maclean is a member of the Institute of Revenue, Rating and Valuation; and of the Royal Institute of International Affairs (Chatham House).

He holds the Reserve Decoration and in 2019 was named by Arabian Business as one of the 100 most influential people in the UAE.

Espen Karlsen – Chief Executive Officer – Jernia

Espen Karlsen completed his education at the Norwegian Hotel College in Stavanger, and is a skilled chef. He worked for 15 years for Nordic Choice as Nordic Sales Director, and Hotel Director at Farris Bad and The Thief, among others. From 2013 to 2017 he led the Raise Group, which owns and operates three hairdressing chains with 150 hairdressing salons in Norway and Sweden under the brand names Nikita, SaySo and Headmaster.

Espen has led Jernia since April 2017, with a strong focus on customer satisfaction. He is convinced that the future of retail lies in making a meaningful contribution to the green transition. He is leading Jernia towards operating on a circular business-model basis. This includes initiatives like lending tools to customers rather than selling them; providing comprehensive repair services; and finding ways to recycle materials and components when they reach the end of their useful life. The focus should be on durability, not disposability. The key revenue shift will be from direct sale to service and leasing options.

Yngvill Ofstad – Sustainability Manager – Bergans of Norway

Yngvill Ofstad is Sustainability Manager in Bergans of Norway. She works with due diligence in the supply chain and with developing the circular services in Bergans. She has a Master in sociology from the University of Oslo, and has previously worked with sustainability in IKEA Norway.

Juan Carlos Orozco Rodríguez – Chief Strategy & Sustainability Officer – Celsa Group

Juan Carlos is currently Chief Strategy & Sustainability Officer at Celsa Group. Celsa Group is the first European producer of recycled steel with a turnover of € 5.2 billion. Juan speaks 5 languages and has three degrees from IESE business school, Stanford University GSB, and University of Barcelona.

Élodie Parre – Group Sustainability Director – Bel

Freya Burton – Chief Sustainability Officer – LanzaTech

With a background in biology, Freya started her career in carbon recycling as one of the first employees of LanzaTech, working directly with LanzaTech's gas fermentation process in the laboratory. She has firsthand experience of scaling and commercializing a new technology, from the R&D stage, through the challenges of fundraising and navigating the legislative environment to deploying new technologies to scale globally.

Today she leads the Government Relations and External Relations teams at LanzaTech and plays a key part in advocacy groups around the world focused on Circular Economy, Carbon Capture and Utilization, the Bioeconomy and Low Carbon Fuels. She interacts across multiple sectors supporting the commercialization of new low carbon technologies, including contributing to reports on scale up and impact and providing insights on what common issues impacting the deployment of new technologies. Freya has an MA from Cambridge University.

Linzi Boyd – Founder & CEO – OneEarth

Visionary leader, Linzi Boyd is the woman known for building famous brands and speaking on the world stage about global trends. Here to create the face of the modern world she is also a best-selling author, serial entrepreneur and Founder of One Earth. By age 24 Linzi had set up and sold two businesses. Her second company was sold to Caterpillar and her third business, Surgery, championed some of the most well-respected brands known today.

Linzi now works in the enterprise market, teaching entrepreneurs how to build a famous brand for bigger valuation and scale to impact in the world, changing the way modern business operates and creating the face of modern business.
